

AV/YPbPr/DVI/VGA/HDMI to HDMI Converter / Switch All in one box

User Manual

Safety Notes:

- 1). In order to avoid fire, electricity shock or product damage, please keep the product away from rain, damp, any other liquid, and pressure.
- 2). Keep ventilation. Don't put the product in any enclosed cabinet during it is working, otherwise product damage or fire may be caused by high temperature.
- 3). Don't touch the power adapter with wet hands.
- 4). Turn off the power before plug in/output equipment
- 5). Working power is 12V/1A. Please check the power adapter parameters before you change it.
- 6). Please keep the user manual for future reference.

VGA input	Supports adjust phase position,underscan, overscan,automatically. Rusolutions supported: 640x480(60Hz,72Hz,75Hz), 800x600(60Hz,72Hz,75Hz), 1024x768(60Hz,70Hz,75Hz), 1280x768(60Hz),1280x960(60Hz), 1280x1024(60Hz),1400x1050(60Hz), 1440x1050(60Hz),1440x900(60Hz), 1360x768(60Hz)1920x1080(60Hz);
DDC signal	5Vp-p(TTL)
TMDS signal	0.5-1.0Vp-p
HDMI output signal	720p@50Hz/720p@60Hz/1080p@50Hz/1080p@60Hz
Coaxial Audio output	PCM /Auto/Off
power consumption	< 6W
Dimension	400x 128x 31 mm (LxWxH)

- 3.2. Plug in USB storage device or media player to USB1/USB2 ports of the converter.
- 3.3. Connect the converter to the HDMI display by HDMI cable, then connect power of the converter, and switch the TV to the corresponding channel.
- 4.4. The converter is with SPDIF audio output, and connection to digital home theater is optional.

4. Operation

4.1 Functions of main buttons:

- 4.1.1. POWER: Stand by, Turn on/off
- 4.1.2. 720p /1080p: Loop switch output resolution at 720p@50Hz, 1080p@50Hz, 720p@60Hz and 1080p@60Hz
- 4.1.3. VOL+: increase volume
- 4.1.4. VOL-: decrease volume
- 4.1.5. MENU: enter main menu
- 4.1.6. INPUT: Input source menu

4.2 Remote control functions:

- : Press to standby/wake up
- : Mute button
- HDMI: Press to switch HDMI1/HDMI2 input
- AV: AV input
- VGA: VGA input
- MHL: (This feature is temporarily not open)
- DVI: DVI input
- YPbPr: YPbPr input
- TV: (This feature is temporarily not open)
- USB: Press to switch USB1/USB2 multimedia player
- 720P/1080P: Press to switch 720P/1080P
- INPUT: Input source chosen button

MENU: Press to enter menu

EXIT: Press to exit

OK: Button for confirmation

◀ ▶ ◂ ◃ : Arrow buttons/Volume+ -

0~9: Numeric buttons

RATIO: Press to adjust output ratio

FREEZE: Press to freeze screen

NOTE: The appearance is for reference only.

4.3 Remote control battery installation

4.3.1. Push the cover as per the arrow shows.

4.3.2. Install two AAA batteries. Make sure the positive/negative pole match the instruction icon inside the cover.

4.3.3. Put back the cover.

4.4 Connection of input/output ports:

4.4.1. Connection of Composite Video and Audio L/R

Connect the Composite Video (yellow RCA) and Audio L/R (white RCA and red RCA) of the video source (such as VCD, DVD, STB, recorder, DV, camera, etc.) to the corresponding ports of the converter.

4.4.2. Connection of Component Video and audio

Connect the Component Video (Y Pb Pr) and Audio L/R (white RCA and red RCA) to of the video source to the corresponding ports of the converter.

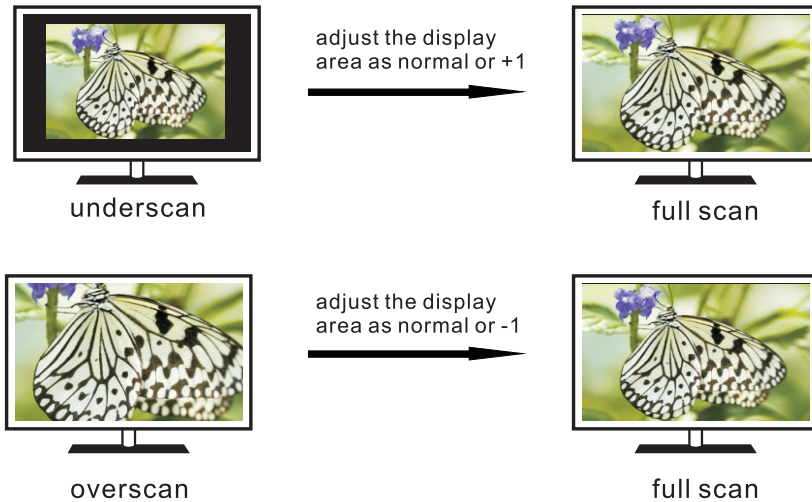

4.4.3. Connection of HDMI port

Connect HDMI source (such as DVD, STB, PS3, DV, etc.) to HDMI input of the converter

6. Specifications

	Specifications
Power	DC12V/1A
HDMI input	Supports 1080p@60Hz 36bit deep color Input resolutions supported: 480i@60Hz,480p@60Hz,576i@50Hz, 576p@50Hz,720p@50/60Hz, 1080i@50/60Hz,1080p@50/60Hz; HDMI graphic resolutions supported: 640x480(60Hz),800x600(60Hz), 1024x768(60Hz),1152x864(60Hz), 1280x600(60Hz),1280x720(60Hz), 1280x768(60Hz),1280x800(60Hz), 1280x960(60Hz),1280x1024(60Hz), 1360x768(60Hz),1366x768(60Hz), 1400x1050(60Hz),1440x900(60Hz), 1600x900(60Hz),1680x1050(60Hz), 1920x1080(60Hz)
DVI-D input	640x480(60Hz),800x600(60Hz), 1024x768(60Hz),1152x864(60Hz), 1280x600(60Hz),1280x720(60Hz), 1280x768(60Hz),1280x800(60Hz), 1280x960(60Hz),1280x1024(60Hz), 1360x768(60Hz),1366x768(60Hz), 1400x1050(60Hz),1600x900(60Hz), 1920x1080(60Hz)
AV input	Supports NTSC/ PAL and detect automatically ;
YPbPr input	Detects signal automatically 480i@60Hz,480p@60Hz,576i@50Hz, 576p@50Hz,720p@50/60Hz, 1080i@50/60Hz,1080p@50/60Hz;

Display area: adjust the display area of VGA, HDMI, DVI input. There are -1/normal/+1 options.
 If there is still black edge or over display(underscan or overscan), adjust display width and height a little. (Available for VGA, HDMI and DVI input)

5. FAQ

Q1. No output display

- A1. 1) Check if all cables connected well, if LED lights, if the TV is switched to the right channel.
 2) Check if TV resolution is compatible with the output resolution of the converter.

Q2. Abnormal output picture

- A2. 1) If HDMI input is HDMI graphic card, check if the resolution is compatible with the converter.
 2) If input is VGA signal, please check the input VGA Resolution is supported by the converter.

HDMI resolution supported:

RGB/60Hz: 640x480, 800x600, 1024x768, 1152x864, 1280x600, 1280x720, 1280x768, 1280x800, 1280x960, 1280x1024, 1360x768, 1366x768, 1400x1050, 1440x900, 1600x900, 1680x1050, 1920x1080.

YUV/50Hz: 576i, 576p, 720p, 1080i, 1080p.

YUV/60Hz: 480i, 480p, 720p, 1080i, 1080p.

4.4.4. Connection of DVI-D

Connect PC with DVI-D graphic card to the DVI-D input of the converter, and connect 3.5mm audio (the one 3.5mm audio input port of the converter can either be used by DVI-D input or VGA input).

DVI-D resolution supported:

RGB/60Hz: 640x480, 800x600, 1024x768, 1152x864, 1280x600, 1280x720, 1280x768, 1280x800, 1280x960, 1280x1024, 1360x768, 1366x768, 1400x1050, 1600x900, 1920x1080.

YUV/50Hz: 576i, 576p, 720p, 1080i, 1080p.

YUV/60Hz: 480i, 480p, 720p, 1080i, 1080p.

4.4.5. Connection of VGA

Connect the VGA and 3.5mm audio ports of the PC to the converter VGA input and 3.5mm audio input (the one 3.5mm audio input port of the converter can either be used by DVI input or VGA input).

VGA resolution supported:

640x480(60Hz, 72Hz, 75Hz), 800x600(60Hz, 72Hz, 75Hz), 1024x768(60Hz, 70Hz, 75Hz), 1280x768(60Hz), 1280x960(60Hz), 1280x1024(60Hz), 1400x1050(60Hz), 1440x1050(60Hz), 1440x900(60Hz), 1360x768(60Hz), 1920x1080(60Hz).

4.4.6. Connection of USB device

The converter is with standard USB port, and is able to connect USB 1.1 and USB2.0 devices such as USB storage device and media player.

4.4.7. Connection of HDMI display

Connect the HDMI output to HDMI display such as HDTV, HDMI monitor, or projector.

NOTE: Please switch the TV to the corresponding HDMI signal.

4.4.8. Connect SPDIF output the home theater

The audio output is either integrated into HDMI output or output independently to the SPDIF output, and can be connected to digital home theater.

4.5 Input source settings:

Buttons on converter box

enter input source menu	select input source	Confirm	Exit
			

Buttons on remote control

enter input source menu	select input source	Confirm	Exit
			

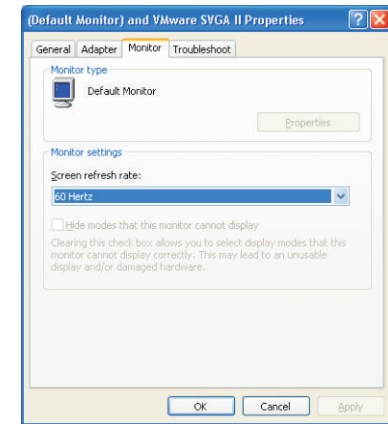

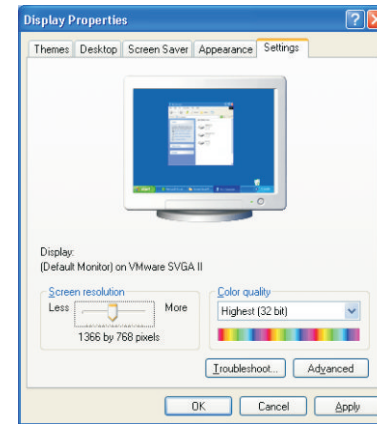

4.5.1. Press  on the converter box or  on the remote control to select input source.

4.5.2. Press  on the converter box or  on the remote control to confirm the input source.

4.5.3. Press  on the converter box or  on the remote control to exit the menu.

Input Source		
AV	AV	select AV input source
YPbPr	YPbPr	select YPbPr input source
HDMI 1	HDMI1	select HDMI1 input source
HDMI 2	HDMI2	select HDMI2 input source
DVI	DVI	select DVI input source
VGA	VGA	select VGA input source
USB 1	USB 1	select USB 1 input source
USB 2	USB 2	select USB 2 input source

4.7.7.4. Press  on the converter box or  on the remote control to exit the menu.

4.7.7.5 Take Windows XP as an example, and the windows system settings is as the pictures shown:

4.7.7.5.1. Right click the mouse on desktop of computer then left click 'Properties'

4.7.7.5.2. Left click 'settings' to adjust the resolution (please refer to the VGA resolution this converter box supported)

4.7.7.5.3. Left click 'advanced', then left click 'monitor', and set the frequency rate at '60HZ'

4.7.7.5.4. Left click 'OK'

Auto: adjust the picture position and ratio automatically (available for VGA input only)

Horizontally move: adjust the horizontal position of the picture (available for VGA input only)

Vertically move: adjust the vertical position of the picture (available for VGA input only)

Time base: adjust the line amplitude of VGA input (available for VGA input only)

Phase position: adjust the phase position of VGA input (available for VGA input only)

Display width: adjust the width of screen display (available for VGA, HDMI and DVI input)

Display height: adjust the height of screen display (available for VGA, HDMI and DVI input)

4:3

16:9

16:10

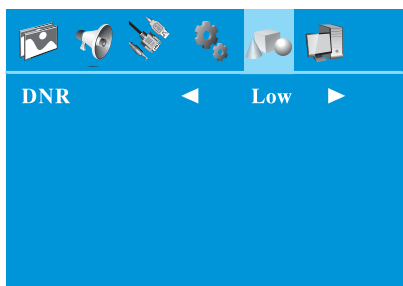

Language: Chinese/English(default:English)

MENU transparent: Off/Low/Middle/High (Default: Off). Adjust the transparency of the menu.

OSD Duration: Off/5 sec / 10 sec/15 sec seconds (default: 10 sec). Menu will display in appointed time.

Default setting: All settings go back to default setting.

4.7.6 Denoise settings

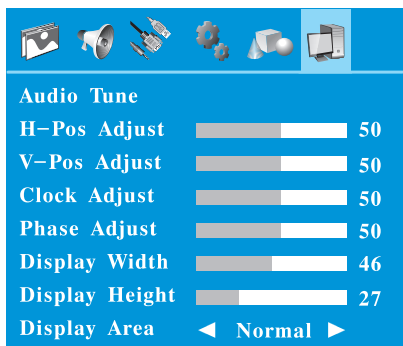

4.7.6.1. Press  on the converter box or  on the remote control to select the options of the denoise settings.

4.7.6.2. Press   on the converter box or  on the remote control to adjust the parameters.

4.7.6.3. Press  on the converter box or  on the remote control to exit the menu.

Denoise: Off/Low/Middle/High (default: Low). Optimize the quality of the picture; decrease the interference of outer environment.

4.7.7 PC settings

4.7.7.1. Press  on the converter box or  on the remote control to select the options of PC settings.

4.7.7.2. Press   on the converter box or  on the remote control to adjust the parameters.

4.7.7.3. Select AUTO item and press  on the converter box, or  on the remote control to adjust the screen automatically.

4.6 Menu settings:

Buttons on converter box

enter input source menu	select input source	Confirm	Exit
	  		

Buttons on remote control

enter input source menu	select input source	Confirm	Exit
			

4.7 Menu option:

4.7.1 Menu option selection

4.7.1.1. Press  on the converter box or  on the remote control to exit the menu.

4.7.1.2. Press   on the converter box or  on the remote control to select the option to adjust.

4.7.2 Picture mode settings

4.7.2.1. Press  on the converter box or  on the remote control to enter into different parameters setting of the picture.

4.7.2.2. Press   on the converter box or  on the remote control to adjust the value of the parameter.

4.7.2.3. Press  on the converter box or  on the remote control to exit the menu.

The following parameters are adjustable under picture mode : Standard/ Mild/User/Vivid (default:Standard)

Brightness: 0~100

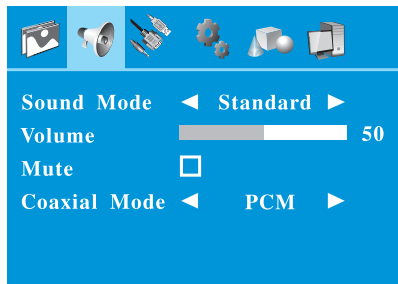

Contrast: 0~100

Saturation: 0~100 adjust density of color. It is unavailable for VGA input

Color: 0~100 adjust green and red color hue. It is available for NTSC only

Sharpness: 0~100 It is unavailable for VGA input

4.7.3 Sound mode settings

4.7.3.1. Press on the converter box or on the remote control to enter into sound parameters setting.

4.7.3.2. Press on the converter box or on the remote control to adjust the value of the parameter.

4.7.3.3. Press on the converter box or on the remote control to exit the menu.

4.7.3.4. Select MUTE and press on the converter box or press on remote control to turn on/off mute function.

Sound mode: Standard/Concert/Movie (default:Standard), set sound effect.

Volume: 0~100

MUTE: ON/OFF, when mute is on, mute icon displays for 5 seconds, and after that, It's in Mute mode, but mute icon disappears.

Press it again to turn audio on.

Coaxial mode: PCM / AUTO / OFF

4.7.4 Channel settings

4.7.4.1. Press on the converter box or on the remote control to select one of the input source.

4.7.4.2. Press on the converter box or on the remote control to confirm the selection.

4.7.4.3. Press on the converter box or on the remote control to exit the menu.

AV	select AV input source
YPbPr	select YPbPr input source
HDMI1	select HDMI1 input source
HDMI2	select HDMI2 input source
DVI	select DVI input source
VGA	select VGA input source
USB 1	select USB 1 input source
USB 2	select USB 2 input source

4.7.5 Settings

4.7.5.1. Press on the converter box or on the remote control to select the options.

4.7.5.2. Press on the converter box or on the remote control to adjust the value of the parameters.

4.7.5.3. Press on the converter box or on the remote control for default setting.

4.7.5.4. press on the converter box or on remote control to exit the menu.

Output display mode: 720p@50Hz,720p@60Hz ,1080p@50Hz, 1080p@60Hz (default: 1080p@60Hz)

Display ratio: 4:3 16:9 16:10 Auto(default: 16:9)

AV: 4:3 16:9 16:10 Auto

YPBPR: 4:3 16:9 16:10 Auto

HDMI: 4:3 16:9 16:10 Auto

DVI-D: 4:3 16:9 16:10 Auto

VGA: 4:3 16:9

When you select AUTO mode, the converter box will detect the input picture format and output at a kind of ratio automatically .
